

Thank you for your interest in this database!

Instructions to install the database

- 1 | **Unzip and extract the files into your computer.** Don't forget to save your version in your local machine*.
- 2 | Open CES EduPack and select **"add database"** in the **top right** corner from your main start menu.
- 3 | **Select the .gdb file** in the folder of your computer and open it.

* Note that if you **download more than one database**, keep the .gdb file and the index folder in the same location, since each database has its own separate index files.
