

How to download and install a new database

- 1 Right click the database, zip and extract the files into your computer. Don't forget to save your version in your local machine.

Important: If you download more than one database, put each database in its own folder.

- 2 Open CES EduPack and select "add database" in the top right corner from your main start menu.

- 3 Select the .gdb file in the folder of your computer and open it.
